DETAILED ACTION

1. This office action is in response to the preliminary file on 6/24/05.

- Claims 24-25 have been cancelled.
- Claims 1-23 are pending in the application.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 19, 21-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Kunikiyo (6,538,954).

Regarding to claims 19, 21-23, Kunikiyo discloses a memory cell for suppressing threshold leakage in a transistor, the memory cell comprising: a plurality of transistors (MC, RK) configure to store a value, wherein the value can under-drive the transistor in its off state, wherein if the transistor if a PMOS device having a source/gate voltage of VDD and the memory cell drives a gate/source of the transistor, the value is slightly more positive/slightly less than VDD ($V_{DD} + V_{thn} / V_{DD} - 2V_{thn}$), and wherein if the transistor is a NMOS device having a gate

Art Unit: 2827

voltage of VSS and the memory cell drives a source of the transistor, then the value is slightly more positive than VSS. *See Figs. 2-10, 13-27; Cols. 12-23.*

With regard to claims 1, 5-17, they encompass the same scope of invention as to that of claims 19, 21-23 except they draft in method format instead of apparatus format. The claims are therefore rejected for the same reason as set forth above.

Allowable Subject Matter

3. Claims 2-4, 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Honda et al. (6,829,194) disclose semiconductor device that enables simultaneous read and write/read operation.
